## Private Jet Services Group Expands – Announces Opening of West Palm Beach

**Seabrook NH, 02 December 2011:** Demonstrating continued growth and a methodical approach to narrowing the distance between the firm and its clients, The Private Jet Group of Companies announced today the opening of its West Palm Beach (PBI) offices.

As a leader in providing top quality, consultancy-based services to its customers, Private Jet Services Group (PJS), one of the Private Jet Group of Companies, opened the West Palm Beach Private Jet location November 15, 2011. Plans include the immediate hiring of both Operations and Sales Support staff, with the goal of improving PJS's reach and proximity to its core clientele.

Greg Raiff, CEO of Private Jet Services Group and the Private Jet Group of Companies remarked, "The reality is our clients have a myriad of choices in the Private Jet industry. We have found that the value of face-to-face contact, whether to review the economics of a new private jet acquisition, or simply to have a friendly, familiar face when arriving at the airport, means all the difference to our guests. The establishment of the firm's larger presence in Palm Beach County, and PBI in particular, is the next logical step in our mission to relentlessly focus on customer satisfaction. Private Jet Commercial Group (PJC) will draft off this as part of our strategic growth plan in 2012."

### **About Private Jet Services Group**

Private Jet Services Group is a privately held corporation that was formed in 2003 by Greg Raiff, who is the current president and CEO. Raiff has over 22 years in the aviation industry and is widely respected as one of the leading executives in the aviation logistics industry, with a specialization in the sourcing of both VIP and standard-configured airliners for live entertainment touring, large group, professional and collegiate sports team travel. The company has a diversified client base that extends into various segments throughout the world including luxury travel, incentive travel, business fleet management, and other corporate needs.

### **Aircraft Charter**

PJS specializes in the charter of executive business jets, and VIP configured specialty airliners through a proprietary network of vetted air carrier partners. PJS's partnerships with Part 135 and Part 121 air carriers provides their clients access to premium, late-model aircraft, delivering the freedom and flexibility to select the right aircraft, seating configuration, and accoutrements for every taste. Through their innovative Total Flight Management program, PJS customizes each and every flight, presenting clients with a portfolio of carefully selected aircraft options, and an up-front, "no surprises" pricing model that is cutting edge compared to the high membership costs and hidden fees common in Flight Card and Fractional Jet Ownership programs.
